

THE BUILDING BLOCKS TO LEARNING ROCK WORK FACILITATION

This pyramid is a visual representation of the steps to becoming a skilled Rock Work Facilitator. From the bottom of the pyramid up you are encouraged to focus on building your experience in each level. As you progress through each level you will have the capacity to integrate the next level. This is a process, and it requires time and practice to become adept at the first four levels. Then, you will have the presence of heart and mind to be aware of and grow in the top three levels. These levels add greater depth to the Rock Work experience.
